Programming in C/C++

Exercise 0

!!! Deadline: Tue, Oct 22ᵗʰ, 23:55 !!!

1. Create a C-program which prints "Hello World" to the console. Also create a Makefile called "Makefile" which compiles your output to produce an executable file called "helloworld"

Also, provide a report listing 5 differences between C/C++ and Java.

Zip your solution and submit it to Moodle.
Your submission should follow the exact specifications given for the exercises.

There are no points for this exercise. However, it is strongly recommended to participate so that you understand how to properly submit solutions in the future.
